You may have read the [“About Dr M Montagu” page](#) on my website and discovered that my life mission is to help people through life transitions/changes/crises.

If I'm good at it, it's not because of my qualifications, but because of my personal experience.

I lost one eye and 60% of the sight in the other, but I coped. Mostly because I have a sense of humour on steroids, but that's another story.

I even wrote [a book](#) about it.

I help people through life transitions so that they can live purposeful, meaningful, fulfilling and impactful lives.

Stress-invested lives are so last century.

It's time to rewrite your life's story.

To step back and reevaluate your past. Often, the smallest shifts in perspective can reveal life-changing insights. So that's what we'll do when you enrol in the iNFINITE iMPACT Mentoring Program. We'll work together to realign your life with your values, your interests, your talents, your skills and your aspirations.

Maybe you have been telling yourself, *“I'll focus on this when the time is right.”* The problem with "someday" is, that there is never time for it.

Life has a way of sweeping us along unless we make the conscious choice to pause, reflect, and recalibrate. And the longer you wait, the harder it becomes to break free from the patterns that no longer serve you.

The good news? You don't have to wait. You can start right now. The [iNFINITE iMPACT Mentoring Program](#) is designed to meet you exactly where you are and guide you toward the life you want.

I am an experienced medical doctor (MBChB, MRCP, NLP master pract cert, Transformational Life Coach dip, Counselling cert, Med Hyp Dip and EAGALA cert) with a

special interest in stress management. I may have an impressive number of letters after my name, but what qualifies me to excel at what I do is my intuitive understanding of my clients' difficulties and my extensive personal experience of managing major life changes using strategies I developed over many years.
